3 January 1955

MEMORANDUM FOR MATERIEL AND OPERATIONS BRANCH, SAFLL
ATTN: Mr. Robert D. Wilson

SUBJECT: Alabama Meteorite

In connection with the attached letter to Senator Sparkman concerning the "seizure" of the Alabama meteorite, the following is offered as a basis for reply:

> The Air Force feels a very definite obligation to identify and analyze things that happen in the air that may have in them a menace to the United States and, because of that feeling and in pursuit of that interest, the Air Force established an activity known as the Unidentified Flying Object Program.
>
> In connection with reports of an unidentified flying object which fell from the sky at Sylacauga, Alabama, the Air Force authorities at Maxwell Air Force Base sent two officers to investigate. The investigating officers talked with the Mayor and the Chief of Police of Sylacauga, Alabama, and the object which had fallen from the sky through the roof of Mrs. Hodges' home was turned over to them by these two public officials for further examination. It was flown to the Air Technical Intelligence Center at Wright-Patterson Air Force Base, Dayton, Ohio, and there determined to be a meteorite by competent technical officials. Subsequent to that it was returned to Mrs. Hodges through the intermediary efforts of SAFLL.

1 x Davidson, L. Mr.

5 JAN 1955

Dear Mr. Davidson:

You recently requested a copy of a press release concerning the meteorite which I returned to the attorney for Mrs. Hewlett Hodges on 9 December 1954 in the office of Congressman Roberts of Alabama.

There was no press release issued by the Air Force concerning this matter. For your information I am setting forth the basic facts concerning the Air Force's interest in this meteorite. In line with the responsibility of air defense of the nation, the Air Force feels a very definite obligation to identify and analyse things which happen in the air and which may indicate a menace to the United States. The Air Force has established an activity known as the Unidentified Flying Object Program to pursue that interest.

At the time of the reports that an unidentified flying object fell from the sky at Sylacauga, Alabama, two Air Force officers from Maxwell Air Force Base, Montgomery, Alabama, were sent to investigate. The investigating officers talked with the Mayor and the Chief of Police of Sylacauga, Alabama, and the object which had fallen from the sky was turned over to them by these two public officials for further examination. It was flown to the Air Technical Intelligence Center at Wright-Patterson Air Force Base, Dayton, Ohio, and competent technical officials there determined it to be a meteorite. The Air Force then took immediate steps to have the meteorite returned to the attorney for Mrs. Hodges of Sylacauga, Alabama, upon whose home the meteorite fell.

SAFLL 24519-KM

The Honorable John J. Sparkman,

5 JAN 1955

Dear Senator Sparkman:

I refer to your recent expression of interest in behalf of Mr. Paul W. Mathews concerning Air Force interest in the meteorite which struck in Sylacauga, Alabama, during November 1954.

In line with the responsibility of air defense of the nation, the Air Force feels a very definite obligation to identify and analyze things which happen in the air and which may indicate a menace to the United States. The Air Force has established an activity known as the Unidentified Flying Object Program to pursue that interest. At the time of the reports that an unidentified flying object fell from the sky at Sylacauga, Alabama, two Air Force officers from Maxwell Air Force Base, Montgomery, Alabama, were sent to investigate.

The investigating officers talked with the Mayor and the Chief of Police of Sylacauga, Alabama, and the object which had fallen from the sky was turned over to them by these two public officials for further examination. It was flown to the Air Technical Intelligence Center at Wright-Patterson Air Force Base, Dayton, Ohio, and competent technical officials there determined it to be a meteorite. The Air Force then took immediate steps to have the meteorite returned to the attorney for Mrs. Newlett Hodges of Sylacauga, Alabama, upon whose home the meteorite fell.

I trust that this information will serve to indicate that the Air Force has no desire to encroach upon the lives of private citizens but acts only in the defense of the United States.

U.S. Air Force
Project Bluebook
(Flying Saucers)

Dear Sirs:

My name is Kenneth Hansen. I am a student at Richmond Hill High School in the borough of Queens, L.I. N.Y. I am in my third term and have Public Speaking as a major subject. As a part of the final mark we were all asked to give a speech to convince. I decided that myself and two other boys would try to convince the class that Flying Saucers are real and that they are interplanetary. We thought this would be easy. But we soon found out that at least three quarters of the class did not believe us.

Two very smart students in this class have already seen a U.F.O. Our speeches must have been good since my mark was 99, the two other boys marks were 97, and 90.

We asked those who did not believe us what proof we could give them. They said they wanted tangible proof. We showed them pictures of U.F.O.s that George Adamski took at Palomar Observatory.

I would like to know if you have any information that is in leaflet form that I could buy. Also if you have any slide pictures I could by that we be of some use to show to the class. If you have any information concerning

NW 91198
DocId:34745775 Page 15

these Flying Saucers I would very much like to hear from you. I am very interested in the reports of these many U.F.O. sightings.

If you would write a letter to me even if you do not have any information I would like to read the letter to the class to show them that the Air Force ist taking a interest in these Flying Saucers. Thank you.

Yours truly,
Kenneth Hansen

My dear, Mr. Sec. of the Air Force:

I am addressing this letter to you because I have good reason to believe that you above all would know about such things. In the past five years I have become extremely interested in flying saucers and anything to do with them.

I am in my last year of high school and have been wondering about what kind of a course in college that might prepare me for a future hope of investigating these objects.

Although your department has said that there is no such thing as a U. F. O. and since there is no such thing as a U F O there is no need to investigate them I would like your honest opimion of what I should do about my fascination for these saucers and my hope of being fit to examine anything to do with them.

Since many of the worlds most famous scientists are now working on these saucers and so many have voiced their opinion on them, I do not think that I am out of place in writing to you about them.

I would appreciate a reply from you personally.

Most respectfully yours,

Howard Sockel

P. S. If I am not too bold in telling you a little honest advice. I wish that your department would go back to the policy of slowly letting the public know about these saucers instead of hiding the evidence.

If war was ever to break out and it could at any moment or time, and if Russia would let out that they control the saucers, you would most certainly have to tell the American people the truth to prevent total havoc.

But on the other hand if you would slowly let infomation leak out about these saucers and thus prepare the people for the final truth, I know that nothing bad could come of it. In this age the American people could stand anything, even the fact that we are being visited by .....

INT 2-2-7
X Keyhoe, Donald E
Mr.

IN REPLY REFER TO
OMR:463:FLT:pn
Ser 1545
24 January 1955

Mr. Donald E. Keyhoe
214 Kent Road
Alexandria, Virginia

Dear Mr. Keyhoe:

This will acknowledge your letter of 2 December 1954, in which you requested information about unidentified flying objects.

Many of the questions contained in your letter concern sighting reports by naval personnel. This Office does not receive such reports and is in no position to comment on matters related thereto. All reports of unidentified objects originating within the armed forces are sent directly to the cognizant group at Wright Patterson Air Force Base in Ohio, since the Air Force is the responsible agency in this investigation. You are advised to refer to the Air Force all inquiries concerning such reports, regardless of their source.

Both the Army and the Navy are actively cooperating in the expeditious handling of sighting reports and assisting to the best of their abilities when requested by the responsible group within the Air Force. This Office maintains liaison with the Air Force in order to keep advised of the status of the investigation. According to the information received to date, there is insufficient data available to prove any single hypothesis regarding this peculiar phenomenon. There is no indication whatsoever that any danger may be involved.

With reference to your question concerning a statement by Dr. Urner Liddel that was published in Look Magazine in 1951, it should be stated that the opinions expressed in that article were based on the information available to him at the time. There is no doubt that many unidentified objects noted during that period were high altitude research balloons. The Air Force is now informed of all such balloon operations under cognizance of the Navy.

For your further information the Office of Naval Research is currently interested in many applications of magnetics and magnetic materials, including basic factors affecting them. However, no work in the field of "magnetic power" as such, is under consideration as a possible means of propulsion for guided missiles and/or space vehicles.

214 Kent Road,
Alexandria, Va.,
Dec. 2, 1954

Chief, Office of Naval Research
Navy Department
Washington 25, D. C.

Attention: Lt.Cdr. Frank Thomas, ONR.

Dear Sir:

In the past few months, I have received conflicting statements from various sources about the Navy's part in the investigation of Unidentified Flying Objects, and its opinions in certain cases. I should greatly appreciate official answers giving the Navy position in regard to the following items.

1. The Tremonton, Utah motion picutres, taken by Navy Warrant Officer Delbert C. Newhouse, July 2, 1952. In the May, 1954 issue of TRUE Magazine, Capt. Edward J. Ruppelt, USAFR, states that photographic experts found the Navy's evaluation methods faulty. This is contrary to my understanding. I have been led to believe, by informed sources, that the Navy analysis made these points:

A. They (the objects) appear to be a light source rather than reflected light. It is felt that if they were reflected light some blinking would have occurred as they passed through the flight movements observed on the film.

B. The size of the objects could not be determined as they appear merely as points of light, however they all seem to be of the same size.

C. The shape of the objects could not be determined for the same reason, but they appear circular.

D. The general color of the objects seems to be bluish-white, the other colors noted apparently being due to color aberration in the lens and to processing defects.

E. Speed of the objects can be calculated only on the basis of the distance from and their movement relative to, the observer. It is felt that if the objects were balloons or aircraft of known dimensions, they could have been identified if within a distance of 5 miles.

COPY

COPY

NW 911198
DocId:34745775 Page 34

COPY

COPY

The resolution power of the lens is insufficient to identify objects of such dimensions if in excess of five miles. If the distance is assumed to be fived miles and the movement perpendicular to the line of sight, the average velocity would be 653.5 mph; likewise, at 2 ½ miles distance the average speed would be 326.75 mph, and at 7 ½ miles, 980.25 mph.

F. Generally, the movement of the individual object in flight appears to follow an ellipitical or circular pattern within the group.

G. It cannot be determined what the objects are. However, there are a few things which it is believed they are not:

1. Balloons -- with the telephoto lens used, weather balloons within five miles distance could have been identified. The speeds calculated for the objects if only 2 ½ miles away of 326.75 mph is in excess of any wind blown balloons.

2. Aircraft -- within a five mile range an aircraft of 40 foot wing span could be identified clearly. At the time the photographs were taken, there was no group flying by aircraft capable of the assumed speeds, and certainly not capable of such maneuvers at those speeds.

3. Birds -- these objects appear to be a light source rather than reflecting light, but should they be only reflecting light no bird is sufficiently reflective to cause the film to react as strongly as it has done.

(This ends the material which, I understand, constitutes the main points of the official Navy analysis by the U. S. Navy Photo Interpretation Center, Washington, D. C.)

I should like to know whether the points listed above are in accordance with the Navy analysis, and also any other information which can be given me in regard to the Tremonton, Utah picutres. I should like to know whether Warrant Officer Newhouse was ever given back the original of this film, whether he received a copy of the Navy analysis, and whether he is permitted to discuss the pictures with the press, or to correspond in regard to them.

2. In 1951, Dr. Urner Liddel, of ONR, was quoted in LOOK Magazine and elsewhere as stating that "There is not a single reliable report (of UFOs or Flying Saucers) which is not attributable to the cosmic balloons." In 1952 and 1953, I was officially informed by the Air Force that this was not correct, though they had carefully matched the course and position of cosmic-ray balloons with UFO sighting reports. In view of this, does the Navy agree with Dr. Liddel's 1951 statement? If so, why is the Navy taking part in the continued investigation of Unidentified Flying Objects.

COPY

COPY

NW 91198
DocId:34745775 Page 35

COPY

COPY

3. I should like to know whether the July 23d (1954) Potomat River Naval Command directive on UFO reporting has been since revised, and if so I should like to have a copy of the revised directive. I understand, after a study of Air Force Regulation 200-2, August 12, 1954, that the PRNC directive was based on this Air Force Regulation, and that this Navy cooperation was at the request of the Defense Department. Is this correct?

Also, I should like to know whether this directive, in the same or similar form, was issued in other Naval Districts, and to our Navy forces abroad.

4. An AEC chemist, or a chemist formerly with AEC, named Leon Davidson, has written me his conviction that the so-called "Flying Saucers" are secret Navy devices. He refers to alleged Navy secret annual reports and references to round aeroforms and artificial meteors, some of which he states were at least partly developed in 1942. Several times, I have discussed these suggestions -- not necessarily as from Davidson -- with Rear Admiral Calvin Bolster, USN, (now retired), and Rear Adm. Delmar Fahrney, USN, Ret, both of whom are Naval Academy classmates of mine. Both convinced me that there was absolutely no foundation for the claims such as Davidson has made. In addition, I am sure such devices would have made present jets obsolete; we would have used them in Korea -- perhaps toward the end of World War 2 -- and certainly would not now be in any serious danger from any other nation's conventional aircraft or conventional missiles. (We would, however, have violated the boundaries of practically every nation on earth, in tests and practice operations, if this were the true answer, since the "flying saucers" have appeared practically everywhere on the globe.) For all these reasons, I am absolutely convinced that the UFOs are not a secret device of this country. But I should like a direct answer on this point, unless it is inconsistent with national security. (I realize that the armed services may now be experimenting with devices that could be mistaken for the Unidentified Flying Objects seen in our skies, or for the smaller ones, but I am sure there is no foundation for believing that secret American devices explain the sightings of the past 10 years -- nor most of the present ones)

5. On May 14, 1954, according to the Dallas Times and several radio commentators, Major Charles Scarborough, USMCR, reported sighting a group of 16 UFOs which he said they could describe only "as flying saucers." His quoted statement was reportedly confirmed by members of the Marine Corps jet flight which he was leading at the time. I should like to have any Navy material available in regard to this sighting, including the final conclusion.

6. I have been informed by various sources that UFOs were reported on the night of August 6-7, 1953, by one or more Navy pilots stationed at Barber's Point Naval Air Station, Hawaii. I should like to have any material available on this sighting.

COPY

COPY

NW 91198
DocId:34745775 Page 36

COPY

7. Finally, I should like to have a statement of the Navy's conclusions, if available, in regard to the probable motives for the UFO operations. In the Navy's opinion, does the accumulated information on "flying saucers" or what the Air Force now terms UFOB's, constitute grounds for believing there is any attendant danger?

8. According to a source I believe reliable, the Navy is now experimenting in the field of magnetic power, for propulsion of missiles and/or space vehicles. Since the Air Force publicly announced, some time ago, that it had contracted for research into all phases of magnetics, it seems logical to believe the Navy is carrying on similar research. Will the Navy verify this?

I should welcome any additional information which you feel is appropriate, in regard to the Navy's position on Unidentified Flying Objects.

Very truly yours,

/s/ Donald E. Keyhoe
Major, U.S.Marine Corps, Ret.

Dear Mrs. Gross:

Thank you for your letter of December 14 which described in detail your sighting of an unidentified flying object.

As you are possibly aware, the Air Force has had a major active program in this area over the past several years and your report has been turned over to our analysts for evaluation. The public is kept abreast of our activities in this field through the medium of periodically revised information releases to the press and other news media.

For your convenience I am inclosing a copy of the "U. S. Air Force Summary of Events and Information Concerning the Unidentified Flying Object Program", which compiles all the latest facts established by the Air Force in this area.

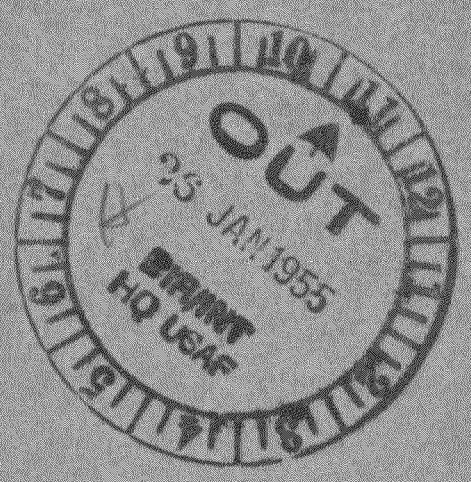

Thank you for your interest in the Air Force.

Sincerely,

Dear Sir:

I have recently been engaged by "Main Events," an evening session weekly newspaper at the City College, to do a series of articles on interplanetary flight, which shall shortly be published.

In one of my installments it shall be necessary for me to deal with the subject of "flying saucers." In connection with this, I should desire to know if it would be at all possible for me to obtain some photographs (preferably 8" X 10" glossy) of the supposed saucers or UFO's.

I should also be greatly appreciative of a fact sheet(s) in reference to some important sightings and the conclusions reached by the ATIC in connection with those sightings.

I wish to impress upon you that this installment (like the others) is intended merely as an attempt to reiterate the "facts" to my readers. However, I will express my opinions concerning this subject after consideration of the evidence.

This particular installment will be published in early March. Thank you for your kind consideration and cooperation in this matter.

Very truly yours,

Maurice J. Weiss

P.S. If this information is not available, I should appreciate the address of the division of General-Mills that undertakes the Skyhook projects.

February 6, 1955

Maj.Gen. John A. Samford
Director of Intelligence
U.S.Air Force
Pentagon
Washington 25, D.C.

Dear Gen. Samford:

I have received from Maj. Gen. Joe W. Kelly, Director of Legislative Liaison, U.S.A.F., a copy of the October, 1954, "U.S.Air Force Summary of Events and Information Concerning the Unidentified Flying Object Program."

I would appreciate receiving answers to two questions concerning this "fact sheet". Your office is the only source for these answers, since the Air Technical Intelligence Center is "charged only with the investigation" and cannot give out results, while the Air Force Press Desk in the Office of Public Information can supply "only that information which is readily available" in that office.

[1] The fact sheet, at the bottom of page 2, states that one of the explanations of known types of visual sightings is:

> "6. Brilliant flashing lights that sometimes appear red and white in color have been reported by observers. This type has been traced to a new lighting system of commercial airlines and military aircraft...."

My question is:In which specific cases did this lighting system prove to be the explanation? In particular, did it prove to be the explanation in the following cases:

Feb. 15, 1953, at St. Matthews, S.C., reported to Shaw AFB. "The object appeared to be a bright white light, which now and then would turn reddish."(Reported by Mr.and Mrs. Johnny Owings.)?

Feb.9,1953, over Washington, N.C., reported to Second Marine Air Wing HQ at Cherry Point, N.C. "White light with two red lights on the left hand side bouncing and flashing off the end, encircling an arc." (Reported by First Lt. Ed Balocco.)?

Dec.29,1952, over northern Honshu,Japan,reported to Lt.Col.Russel, AF Intelligence. "Rotating clusters of red, white, and green lights." ?

NW 91198
DocId:34745775 Page 50

[2] The fact sheet, at the bottom of page 3, states:

"The Air Force would like to state that no evidence has been received which would tend to indicate that the United States is being observed by machines from outer space or a foreign government."

In sharp contrast to this, the Air Force press release of August 1952, based on the minutes of your press conference at the Pentagon on July 29, 1952, stated:

"The Air Force has stated in the past, and reaffirms at the present time, that these unidentified aerial phenomena are not a secret weapon, missile, or aircraft, developed by the United States. None of the three military departments nor any other agency in the government is conducting experiments, classified or otherwise, with flying objects which could be a basis for the reported phenomena. As far as is known there is nothing in them that is associated with material or vehicles that are directed against the United States, from another country or from other planets."

My question to you now is:

What is the present official position of the U.S. Air Force on the question of whether or not "flying saucers" are, and have been in many of the important cases, merely secret aircraft, missiles, and weapons, under development or operational use by the United States Government and its agencies?

It is obvious, from a comparison of the two Air Force statements quoted above on this page, that the Air Force no longer denies that flying saucers are American devices. I would like to get from you, if possible, an explicit statement to this effect, rather than relying on the implication contained in the omitted sentences.

(It is hardly necessary to remind you that the photograph on page 163 of OPNAV P-51-110, Oct.1, 1952, gives the direct lie to the Air Force press release of August 1952, quoted above. The blame for this prevarication attaches to the officer who wrote the press release, since you yourself very skilfully avoided any direct statements at that press conference. Your statement "We have nothing that has no mass and unlimited power!" is a classic which deserves preservation in the archives.)

I would very much appreciate receiving whatever answer you care to make to the two questions propounded in this letter. It is my belief that nowhere but in the Office of the Director of Intelligence is there a person who has the cognizance to answer these questions, and I respectfully request that the answer come from your office.

Sincerely yours,

Leon Davidson

SHEPPARD AIR FORCE BASE
TEXAS

Jan. 19, 1955

Dear Sir:

I am a regular Airman going into Air Force Intelligence. I must admit that the main reason or one of the main reasons I came into the Air Force was so I could go behind the scenes and see the Utah Films.

I'm sure, sir, you have heard of the Utah films taken by Warrant Officer Delbert C. Newhouse at 11:10 A.M. on July 2, 1952 showing the Air Force that they had the proof that Flying Saucers, or Unidentified Flying Objects (UFO) were real.

This proof, the Air Force had been waiting for since June 24, 1947 when Kenneth Arnold set off the "Flying Saucer" uproar.

Sir, I'm a citizen of the United States, the greatest country in the world, and I love my country and the people in it and I believe like most Americans in knowing the facts.

I would like to see the film sir, because, going into Air Force Intelligence, I am most interested in the Flying Objects which have been observing our country for the past 5 years.

Please help me in my request, sir, and

NW 91198
DocId:34745775 Page 52

help me to understand the problem better by knowing the facts.

I must tell you that Major Keyhoe is one man who made up my mind concerning these things. I think he is a great man.

I feel that I know enough about these things and would like to understand further the problem that faces the United States Air Force which is the greatest outfit in the world.

Please help me in my request sir, I would appreciate it very much.

Thank you very much.

Sincerely yours,

Dear Airman Russell:

Your letter to General Twining has been referred to this office for reply inasmuch as the Directorate of Intelligence has cognizance of the overall program in the investigation of Unidentified Flying Objects.

As you are probably aware, the Air Force has had a major active program in this area over the past several years and the responsible agency within the Directorate of Intelligence for this work is, and has been, the Air Technical Intelligence Center at Wright-Patterson Air Force Base, Dayton, Ohio. The American public, through the various news media of newspapers, radio, and television, is kept abreast of our progress in this field by means of periodic summaries of progress made.

For your convenience, I am attaching a copy of the latest summary which compiles all of the facts available to the Air Force as a result of those investigations.

Very truly yours,

~~CONFIDENTIAL~~

From: Chief of Naval Research
To: Director of Intelligence, U. S. Air Force

Subj: Unidentified flying objects; request for information concerning

1. Various technical personnel within this Office have an acute scientific interest in the results obtained in the current investigation of unidentified flying objects. For this reason it is requested that a briefing on this subject be arranged for the purpose of acquainting these personnel with the data obtained from reliable reports of sightings classified as being of unknown cause.

2. It is suggested that an informal question-and-answer type discussion be scheduled on some mutually convenient date during February in Room 1803, T-3 Building. Those in attendance, approximately 25 in number, will be limited to senior technical personnel from this Office and certain individuals from other cognizant naval activities in this area. All those attending will have clearance through secret and a definite need-to-know. Final arrangements can be made with LCDR F. L. Thomas (extension 62945) who is acting as Liaison Officer to the Air Force on this problem.

3. The cooperation of the Air Force in making such a briefing possible will be appreciated.

February 8, 1955.

United States Air Force
Washington, D.C.

Dear Sirs:

I was profoundly shaken upon reading Major Keyhoe's, "Flying Saucers from Outer Space." A revelation to me,it amounted to an unofficial Air Force admission of the existence of these interplanetary objects. A February 6, Associated Press dispatch reported that a mysterious explosion of terrific force shook the west coast of New Zealand's South Island.Synonymously a cigar-shaped object emitting a dazzling light was sighted, travelling at a high speed as it disappeared into the horizon.

The world must be prepared both psychologically and materially in the event of any sudden maneuver by these hypothetical aliens. If we are under surveillance by flying saucers I hope that we are mature enough to reconcile ourselves to that reality.However it would be infinitely worse if we followed a policy of see no evil, hear no evil, speak no evil.It would be suicidal to lull ourselves into a childish sense of security.

It is imperative that you express your candid and firm belief as to the nature of these, "Unidentified Flying Objects" to the public. MUCH hinges on your prompt action.

Truly yours,

George Tumarkin :Student

P.S. Kindly answer my letter.Thank you.

Dear Miss Weiss:

In reply to your letter of February 12, requesting information concerning unidentified flying objects, I am inclosing a copy of the "U. S. Air Force Summary of Events and Information Concerning the Unidentified Flying Object Program" which compiles the latest facts the Air Force has established in this field.

As you are probably aware the Air Force has an active program in this area and the public in general is kept abreast of our activities in this field through the medium of periodically revised information releases to the press and other news media.

Thank you for your interest in this matter.

Sincerely,

Dear Mrs. Novacek:

Thank you for forwarding to us your interesting letter of January 4 to the National Geographic Society.

As you may possibly be aware, the United States Air Force has had a major active program in the investigation and analysis of reports of unidentified flying objects for the past several years. Without further details, we are unable to comment on your observation, but for your convenience we are attaching a copy of the "U. S. Air Force Summary of Events and Information Concerning the Unidentified Flying Object Program," which compiles the latest facts established by the Air Force investigations in this area.

Very truly yours,

If It's for the Good of Marysville and Union County WE'RE FOR IT!

The Evening J

'Combining the Union County Journ

Vol. 8, No. 42. MARYSVILLE, OHIO —

'Saucer' Experts Stumped

Jerome Teachers, Students Watch Strange Occurrence In The Sky

Local "flying saucer" scoffers were stumped today by the remarkable Friday afternoon experience of two Union county teachers and at least 60 youngsters.

Their observation: A cigar-shaped silver object traveling at terrific speed that wafted a blanket of "angel's hair" for a least three miles.

The account of the incredible phenomenon was told the Journal-Tribune by Mrs. George Dittmar of Marysville and Rodney Warrick of Ra[illegible]nd.

Mrs. [illegible]ittmar is a teacher and Warrick the principal at Jerome Special school in the southeastern corner of Union county.

Story told by the two reliable teachers—without their previous knowledge—closely parallels the previous experiences of people in at least three countries.

The Friday phenomenon was first observed at the Jerome elementary school when youngsters on the playground about 3:15 p. m. called Warrick outside.

Warrick, ill at home today—with a cold and presumably no after-effects of his experience—said when he first went outside the cigar-shaped object was hanging motionless.

"Then it took off quite rapidly," he said, "disappearing in a short time." He said it traveled horizontally.

Mrs. Dittmar, in the building when Warrick called her, said she went to the fire escape but the object (said by the children to be "blinding") had already disappeared.

have been made in California, in France and in New Guinea in the past two years.

However, neither teacher had heard of the previous accounts of what has been dubbed as "angel's hair."

The term is the title of an article on such phenomenons in the November issue of "Pageant"-magazine.

Written by Lt. Col. James C. McNamara, the article gives accounts of several witnesses to the fall of the substance termed "angel's hair" because of its resemblance to the spun glass fluff used in decorating Christmas trees.

McNamara also reports that some of the substance has been captured on cloth and placed in a jar for observance.

Similar experiences to that of the Union county group, according to the article, have been reported as follows:

In February of this year at Puente, Calif.; Nov. 1953 in San Fernando valley, Calif.; Oct. 1952 at Gaillac, France; August 1953 at Port Moresby, New Guinea.

Each account tells of the webby vapor likened sometimes to "brigh whitish filaments like glass wool" lacy ribbons," or "a stream o white lacy substance."

And in each case, the substance disintegrated with the touch o human hands leaving no trace fo laboratory analysis.

There's been no decision on its origin—outer space, foreign craft, or governmental experiment?

Locally it will remain a matter of conjecture and a never-to-be forgotten experience for Mrs. Dittmar, Warrick and their students.

In its wake was a trail of webs that Warrick and Mrs. Dittmar, driving home later, said were strung from one side to the other of wires along the road all the way to the Columbus road.

Warrick said part of the cobweb-like substance fell in long strands and part of it came down in balls almost like cotton. Trees, bushes and wires were covered.

Warrick said: "It looked to be like asbestos and felt like asbestos."

Both Warrick and Mrs. Dittmar related that when they were able to catch two ends of a strand the stuff could be pulled out into a long thread—"so tough", Warrick said, "that it couldn't hardly be broken."

Within less than a minute after being touched, however, the substance would completely disappear.

Both teachers also concurred in the report that when only one end of a strand was touched, the substance would roll into a ball before disentegrating.

Possibly the strangest part of the report is that when anyone even touched the substance their fingertips would turn green.

Mrs. Dittmar said she was able to rinse the green from her hands without even using soap. Warrick, as an experiment, didn't wash his hands. He said that they broke out into a cold sweat but that the green color disappeared in a half hour or 45 minutes.

Warrick said today: "I have never seen anything like it or heard of anything like it. It was the most unusual sight I ever saw."

He added that no one was frightened. The children—all 6th, 7th, and 8th graders—considered it "quite a lark" he said.

Experience of the two teachers and the children is strengthened by the fact that similar reports

Dear Sir:

I am compiling data on Flying Saucer sightings and cases for the purpose of writing a book explaining the facts behind the greatest mystery of our age. This book is mostly for the benefit of the teenage part of our population. I feel that the public should be prepared for anything to come, especially the younger part of our civilization. They are now maturing and to become the people that make up our world.

I would appreciate any assistance that you could offer me.

Trusting I will hear from you in the near future,

Respectfully,
Michael W. Kruvant

Dear Mr. Chop: (Or anyone else in the Department of
Unidentified Flying Objects)
I would appreciate it if you would answer the
following questions for me.

How did you happen to get in this line of work? Did
you choose it in high school, college, or later?
Is a college education necessary in this line of work?
How long did your education take?
What college did you attend? What courses helped you
most? Have you ever regretted your line of study?
What are your working conditions, hours, etc.?
What is the demand in the Air Force for a man of
your training? Will this demand increase?
Outside of everyday work and experience, what do
you do to improve your knowledge and skills?

I will appreciate your prompt reply, as my theme
is due very shortly.

Thanking you, I am

Sincerely yours,

March 11, 1955

President Dwight D. Eisenhower
White House
Washington, D. C.

Dear President Eisenhower:

I am enclosing a copy of the May issue of CHALLENGE For Men which contains a story entitled "I know Where Flying Saucers Come From". The author is concerned with the fact that on December 15, 1954, you remarked to your press that you had been assured by the Air Force that Flying Saucers were not from outer space. He feels that the Air Force should reveal the reasoning behind this conclusion.

Will it be possible, in view os security regulations, for this information to be forthcoming?

Thank you very much for taking this into consideration.

Sincerely,

s/

VICKSBURG, MISSISSIPPI

REFER TO FILE NO. LMKVC

26 January 1955

SUBJECT: Falling Object - Sardis Lake

TO: Intelligence Officer, U. S. Army Air Force, Washington, D. C.

1. On 8 December 1954 an object was found by local interests on Tract P-125, Sec. 1, T-7-S, R-5-W, Mississippi, and turned over to personnel of this District at the Sardis Dam Field Office, located approximately seven miles north of Batesville, Mississippi. The object is in fairly good shape and has a white parachute attached to it, a paper cover on it marked "Signal Corps, U. S. Army, Radiosonde AN/AMT-3, Serial No. 2295 (number blurred and somewhat doubtful), Order No. 11083-Phila - 47-77, Washington Institute of Technology, Inc." Stamped on the inside of the cover of this device are the letters S-C and appearing directly under those letters are the numerals 81.

2. This object is similar to another object which was observed to fall in the same vicinity on 8 June 1954 and which was later, upon direction, turned over to Personnel of the Greenville Air Base, Greenville, Mississippi. Report covering that object was forwarded to the Intelligence Office, U. S. Army Air Force, Washington, D. C., by letter of this office dated 6 October 1954, file LMKVE, on the subject "Fallen Object - Sardis Lake, Mississippi."

3. It is requested that this office be advised as to what disposition is desired to be made of the property referred to in paragraph 1 above.

FOR THE DISTRICT ENGINEER:

J. E. WINDHAM
Lt. Col., Corps of Engineers
Assistant District Engineer

U. S. Air Force
Washington, D. C.

I am writing you to testify to the existence of the mysterious flying saucers. I am a Mexican, 37 years old and in full possession of my mental faculties. I am married, and the father of a large family of 6 girls and 3 boys. More than two years ago, I personally saw a flying saucer. It happened one day when I came from Mexicali im my "pick-up", at the point called Cerro Prieto. This craft came in my direction, and I was able to get a full view of its design, since I saw the flying saucer flying at an altitude of about 150 meters, at about 5 miles an hour, for about 150 meters. This happened one morning about 9 A.M. So that your government may be interested, I will describe a small part to you: It was about 12 feet in diameter and the weight about 3 tons, which defies gravity. I am telling you this because when I saw it, it was practically 10 meters from the top of Cerro Prieto, suspended in mid-air. I would appreciate your paying me a reward of $20,000 upon describing its design, which is authentic and genuine. I believe this information is worth much more, because it may be a secret weapon of some enemy nation. Please have some staff officers of your Air Force come to fetch me and please bring a commission of scientists here who can investigate the design and its workings. Also someone versed in atomic science. I hope you will consider my offer.

Dear Mr. Bloomer,

I am, because of several reasons, interested in the so called unindentified flying objects (f.f. saucers). I am aware, the U.S. Air Force has had a major active program in this field for the past several years.
There is a very long list of questions I can ask you on this subject but I'll be short.
You can do me a very great pleasure when you sent me the officially released reports by the Air Force related to U.F.O.'s and „U.S. Air Force Summary of Events and Information Concerning the UFO program".
Thanking you very much.

Sincerely,

J. Schravendijk

AFOIN-1A

SUBJECT: CIRVIS Reports Over Canadian Territory

TO: Commander-in-Chief
Continental Air Defense Command
Ent Air Force Base, Colorado
Attn: Director of Intelligence

1. The Canadian Department of External Affairs has informed this Headquarters through the State Department and the Joint Chiefs of Staff that permission has been granted, as an interim measure, for United States military and civil aircraft flying over Canadian territory to report vital intelligence sightings in accordance with the following principles:

a. If possible, sightings shall be reported by radio to a Royal Canadian Air Force ground station or the nearest Canadian or United States radar station.

b. If efforts to establish contact with such stations are unsuccessful, sightings may then be reported by radio directly to United States authorities.

c. If, after failing to establish contact with a Royal Canadian Air Force ground station, a United States aircraft reports directly to an authority in the United States, that authority shall transmit the information immediately to the Canadian Defense Command.

2. These measures will hold until detailed procedures can be worked out between the Royal Canadian Air Force and the United States Air Force. An RCAF-USAF working group is presently meeting to do this.

3. It is believed that it would be beneficial to have a representative from CONAD sitting in on these meetings with the Canadians to insure that insofar as possible CONAD's desires are made known and satisfied. If this is agreeable, cable notification will be given far enough in advance of each meeting to enable a representative from CONAD to be present.

Dear Sir:

In response to your letter of June 2, I am enclosing a copy of "U. S. Air Force Summary of Events and Information Concerning the Unidentified Flying Objects Program."

For the past several years the Air Force has had an extensive active program in this area and the attached compiles all of the facts which have been established to date by this program.

Very truly yours,

SIGNED

Dear Sirs;

I have become very interested in the subject of flying saucers. I have obtained and read as many book that were within my grasp. I am now starting a file on this subject and I was wondering although you are trying to keep the cap on the lid, if it is at all possible to send me information on the sightings within and through 1940 + 55. Also I would appreciate a form that is to be filled out when a sighting is made. I would appreciate this very much, although I know this is a big order. Thank you.

Sincerely,

Tim Stone

Page 136

STATUS AND INFORMATION SUMMARY
PROJECT BLUE BOOK
FOR THE FISCAL YEAR
1 JULY 1954 - 30 JUNE 1955

A. REPORTS

1. During the reporting period specified, Project Blue Book has received a total of 430 UFO reports, processed in accordance with AFR 200-2 through appropriate military channels. Of this total, 325 or 76% of the reports were submitted by civilian observers, while 105 or 24% were sightings made by military personnel.

B. STATISTICAL BREAKDOWN

1. Monthly Receipts

July 54	50	Jan 55	33	
Aug 54	38	Feb 55	27	
Sep 54	44	Mar 55	34	
Oct 54	41	Apr 55	33	
Nov 54	40	May 55	42	
Dec 54	28	Jun 55	20	
	241		189	= 430

Day Sightings - 130 or 30%
Night Sightings - 300 or 70%

ZI Sightings - 368
O/S Sightings - 62
430

2. Evaluations Accomplished

	1st Half 1 July 54 thru 31 Dec 54		2d Half 1 Jan 55 thru 20 Jun 55	
Balloons	40	17%	52	28%
Astronomical	57	23%	39	21%
Aircraft	76	31%	44	22%
Other (Reflec)	30	12%	36	20%
Insuff Data	23	10%	12	6%
Unknown	15	7%	6	3%
	241	100%	189	100%

The cooperative UFO Program between ATIC and the 4602d AISS (ADC) as established by AFR 200-2, dated 12 August 1954, reached its full effectiveness during this period. A series of conferences between ATIC Project Blue Book personnel and personnel of the 4602d AISS produced an evaluation guide and standard operating procedures.

Encl 1

NW 91198 DocId:34745775
Page 137

This program provides primarily for rapid "on the spot" UFO investigations and as a result the insufficient data cases have been reduced from 10%, during the first half of FY 1955, to 6% during the last half of the year. Unknowns have been reduced from 7% to 3% during the same time periods.

C. GRAND BREAKDOWN

Balloons	- 92	21 %
Astronomical	- 96	22 %
Aircraft	- 120	27 %
Other (Reflection)	- 66	16 %
Insufficient Data for Evaluation	- 35	9 %
Unknown	- 21	5 %
	430	100 %

SUBJECT: Draft of Proposed Combined CIRVIS

TO: Commander-in-Chief
Continental Air Defense Command
ATTN: Director of Intelligence
Ent Air Force Base
Colorado Springs, Colorado

1. Inclosed are two copies of the draft for that part of the proposed combined CIRVIS which the working group has considered. Insofar as possible, the wishes of CONAD have been followed with the drafts left by Commander Thudium and other correspondence serving as guides.

2. Note that US military communications stations in Canada, Alaska and Greenland will address CIRVIS reports to the Canadian circuit as well as the US addressee list when they receive a report of sighting within or adjacent to the North American continent. This is to insure that the Canadian authorities get the report quickly to allow quicker investigative action than might be possible if the report were passed to them later.

3. Another item worth noting is 207a(1) which places the responsibility on one organization of making sure all addressees are notified. This will prevent several activities sending messages to one whose name might have been mistakenly left off the list. It is believed that CONAD is the appropriate US activity to do this.

4. The remainder of the CIRVIS should be reviewed this week and the completed draft ready for final coordination and submission to the joint staff for approval within another week or ten days. CONAD comments are desired on both this and the final draft.

MEMORANDUM FOR DIRECTOR OF COMMUNICATIONS-ELECTRONICS
ATTN: Major York, AFOACS/C

SUBJECT: AFCIN Comments on Proposed Revision to CIRVIS

1. Reference the proposed revision to CIRVIS which is included as Enclosure "A" to Joint Communications-Electronics Committee Memorandum for the Joint Coordinating Panel dated 9 August 1955, subject: "Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft (CIRVIS)."

2. AFCIN coordinates on the proposed revision with the following comments:

a. The title of the document should no longer contain "from aircraft," "while airborne" or similar phrases since the paper will now cover sightings fromthe air and water and some from certain land observers.

b. Enclosure "A" should have "JANAP 146( )" removed from the upper right-hand corner of page 1-1.

c. In sub-paragraph 201a(1)(a) add "Hostile or unidentified" at the beginning of the sentence.

d. In 201a(1)(f) delete all after "unusual location."

e. In 203 delete "or include" in the first line.

f. In 205b add "or erroneous" after "friendly."

g. In 206a(1) add "whichever is the more convenient," after "St. Hubert, Quebec."

h. In 206b add "(2) Canadian and US military communications stations will multiple address the CIRVIS reports to the following address designations;" in the proper place after 206b(1)(a)]. Change the present (b) to (a) under this new (2). Then add under it after 4. "5. RCAF Air Defense Command (CANAIRDEF), St. Hubert, Montreal, P.Q," and "6. Appropriate Flag Officer in Command:" with subparagraphs a. and b. as follows: "a. Canadian Flag Officer, Atlantic Coast, (CANFLAGLANT),

NW 91198 DocId:34745775
Page 145

Halifax, Nova Scotia." and "b. Canadian Flag Officer, Pacific Coast (CANFLAGPAC), Esquimalt, British Columbia." in the proper marginal positions. Finally delete all of the present sub-paragraph 206b(2).

i. In 207a(1) delete "insure that all CIRVIS reports" in the first sentence and replace with "review all CIRVIS reports to ascertain that they". Also add "and forward the reports to any addressees omitted." at the end of the sentence.

j. After sub-paragraph 207a(4) add sub-paragraph (5) as follows: "(5) Sea Frontier Commands will be responsible for notifying CNO concerning CIRVIS reports."

k. In 209a, place a comma after "addressees" in the second line and remove the comma after "authorities" in the same line.

3. Coordination of MATS and CINCCHAD has been received by AFOIN including the comments above.

Philmont Scout Ranch
CIMARRON, NEW MEXICO

July 31, 1955

Dear Sirs,

I thought you might be interested in an incident which happend here at Philmont Scout Ranch on the night of Wednesday, July 27 at approximately 9:30 P.M. At that time a group of JTT's (No. 51) were returning to Zastro after attending an astronomy lecture at Carson-Maxwell. On their hike back to Zastro they were amazed and startled to see approximately 8 UFO's race across Uracca Mesa toward the East. The UFO's began an eccentric maneuver back & forth using their ground lights a great deal of the time. Since it was the first time most of them had ever seen a "flying saucer" - you can imagine the fright created. The amazing

NW 91198 DocId:34745775
Page 147

thing, however was the fact that two of them seem to have spotted the gray + did movements in that direction. Two of the scouts, whose names + addresses appear below, hit upon the idea of attempting some kind of communication. Since I had told them that the UFO's which the Air Force had investigated were found to be built on the same mathematical scale as ours, they sent the number Pi (π) - 3.1416. Needless to say they were all astounded when the UFO returned the same signal. It frightened them so much that they hesitated about making another attempt - + before long the two UFO's left. The two main boys in this attempt were - James D. Nye, Rt. #1, Box 515, Brownsville, Texas, and Edward James Dodson, 14579 Northlawn, Detroit 38, Michigan.

I hope this incident may help you in some

Dear Mr. Czachor:

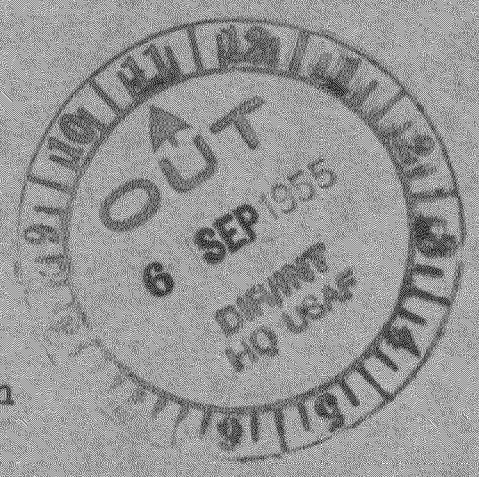

In response to your letter of 23 August, I am enclosing a copy of "U. S. Air Force Summary of Events and Information Concerning the Unidentified Flying Object Program."

For the past several years the Air Force has had an extensive active program in this area and the attached compiles all of the facts which have been established to date by this program.

Very truly yours,

Seattle 1, Washington

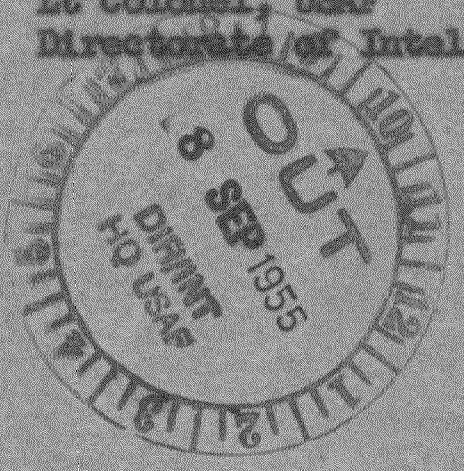

Dear Mr. Gribble:

With reference to your letter of 19 July 1955, you are right in assuming that the Air Force is not firing test missiles over major American cities into the airways of major airlines. We are soon to release to the public information that has been gathered since 1948 pertaining to unidentified flying objects. This has been called Project "Bluebook."

Thank you for your interest in the Unidentified Flying Object Program and the United States Air Force.

Yours very truly,

TIMOTHY R. JOHNSON

July 19, 1955

U. S. Air Force Intelligence
c/o Project Bluebook
The Pentagon
Washington, D. C.

Gentlmen:

My subject is "Flying Saucers". I will keep my letter short as I am aware that your time is very important.

In the August issue of Fate Magazine, there is an article titled "Are The Saucers Made On Earth?" by a James W. Moseley. In this article Mr. Moseley contends that the Saucers are made on earth, and in this country.

I have but one question to ask you. If Mr. Moseley is right then this means that the Air Force is firing it's test missiles, or whatever they are, over major American cities, into the airways of the major airlines, with no regard to the hazard placed over the heads of millions of Americans.

I personally, have great respect for the U. S. Air Force and the men who run it. I cannot make myself believe that the Personal at the top have all lost their marbles, and allow such a thing to happen.

Thousands of people will read that article, and thousands will be asking themselves the same question which I have asked you. Such an article is a disgrace to our Air Force and all of it's members. This Moseley should be slapped down publically.

Yours very truly

Robert J. Gribble

Public Information Officer
Wright-Patterson Air Force Base
Dayton, Ohio

Dear Sir:

I am studying the possibility of doing a magazine piece on the subject of Unidentified Flying Objects and the Air Force effort to check out all reports turned in on sightings or alleged sightings. I am especially interested in whatever units have been assigned the special task of making such investigations and the procedures involved.

Can you send me some preliminary information on this subject and tell me what part of the operation, if any, will be classified and therefore unobtainable? I am more interested, of course, in the men who do the job, than in precise technical data. And I am sure the subject can be handled in such a way that the populace need not be disturbed, but rather reassured that the Air Force is so thoroughly on the job.

I would appreciate it if you could send me certain unclassified documents which I believe pertain to the subject. These would be AF Regulations 200-2 and 200-7, plus an account of early UFOB operations which I believe is called Project Bluebook.

If your office is not the correct one to approach for the above information, will you please forward this letter to the proper contact? However, I believe that the impetus for the operation must stem from Wright field.

Should this idea turn into a story, I probably will do it in collaboration with another Mill Valley writer, Monty Waite, with whom I work occasionally on chores for Post and Colliers. Many thanks for any assistance you can give me.

Sincerely yours,

George S. Wells

Mrs. Edith B. Burton, Box 173, Chase, British Columbia, Canada, observed an unidentified object near her home on 9 August 1955. The observation was made on a clear day with only one or two small clouds in the sky. The observation was made between 5 and 6 p.m. with the sun shining brightly. According to Lt. Burton, she saw an object, saucer in shape, both on top and bottom with something on top resembling a stack. The object was silver in color and passed from east to west and was under observation for about 20 to 30 seconds. No change in speed or altitude was noted while under observation. The object was estimated to be at 8,000 to 10,000 feet in altitude and about a quarter of the size of the moon in size. This sighting is the only time such an object has been sighted by this individual according to Lt. Burton. This one individual is the only person known to have observed this particular object.

Director of Flight Operations 9-7-55

Captain F. W. Cushing

FLIGHT 14 - SEPTEMBER 6, 1955

On Flight 14 of the 6th at approximately 1925 EST, geographical position approximately 16 nautical miles north of the PCW Omni Range, 004 degree track, at 5000 ft. with a clear sky above, unlimited visibility horizontally and a smoke layer below, sighted an unidentified object with a blue-white exhaust flame between a half mile or mile directly ahead at approximately 1000 ft. above our position on what appeared to be about a 200-210 degree heading in about a 15-20 degree angle descent.

In approximately 3 seconds the object had moved from directly in front of us to about 100 degrees from our track placing it off our left beam and was then omitting a lot of sparks as well as the blue flame. At that time, it exploded with a blinding flash within, I would say, a half mile or mile of our position.

Flight 412, who, I believe, was in the vicinity of ALB at about 8000 ft. reported seeing the flash although he was northbound. Southbound Flight 33, who was approximately just south of Coxsackie at about 6000 ft., also reported seeing the flash.

I could not see what the object was except that it appeared like a rocket ship - although that is, perhaps, partially imagination because all I really got a look at was this trail of flame and, just before it exploded, it seemed like pictures I have seen of a stage falling off of a rocket. I don't think it was an airplane as I did not observe any position lights. I feel certain that it was not a meteor as we had been looking in that direction and it just appeared. There was no trace of it until it got right in front of us. Its speed didnot seem to have been in excess of 400-500 mph.

Page 183

Director of Flight Operations 9-7-55

Captain G. R. Janas

At approximately 1925 EST while southbound at 6000 ft. on B 18 at Red Hook intersection, noticed a bright flash above us. Because we were flying through slight Cu buildups with the fuselage lights on, I attributed it to the flash of these lights while inside one of these Cu's. I thought no more of it until I heard Flight 14 advise New York of his sighting and we then advised that we had seen the flash.

G. R. Janas

Page 190

Director of Flight Operations 9-7-55

Captain G. R. Janas

At approximately 1925 EST while southbound at 6000 ft. on B 18 at Red Hook intersection, noticed a bright flash above us. Because we were flying through slight Cu buildups with the fuselage lights on, I attributed it to the flash of these lights while inside one of these Cu's. I thought no more of it until I heard Flight 14 advise New York of his sighting and we then advised that we had seen the flash.

G. R. Janas

Page 191

Director of Flight Operations 9-7-55

First Officer G. M. Darby

On Flight 33 over Red Hook southbound at approximately 1925 EST, there was a flash, which appeared more like an explosion rather than a lightning flish, approximately 10 or 15 degrees off our course at somewhere near our altitude of 6000 ft.

Dear Mr. Clark;

Your letter of September 8th has been received and forwarded to the appropriate analysts for further evaluation.

As you know, the Air Force has a major active program in this field. For this reason, initiative reports such as yours are of immense value and greatly appreicated.

For your information I am enclosing a copy of our summary of events concerning this program. Attached you will find a sample questionaire as you requested.

Thank you for your interest and prompt action.

Sincerely,

TIMOTHY R. JOHNSON

MEMORANDUM FOR DIRECTOR, AFOIN-4
ATTN: Mr. A. F. Arcier

SUBJECT: UFOB Program

1. Reference is made to our discussion, subject above, of 7 September 1955 concerning the release of ATIC Special Report No. 14.

2. Present responsibility of AFOIN-4 is to bring Special Report No. 14 up-to-date as of June 1955.

3. Twenty-five copies of this declassified document, which this Headquarters now has, will be withheld from public dissemination but will be made available on an office retention basis to interested persons in the USAF Office of Information Services and the USAF Office of Legislation and Liaison.

4. It has been agreed that Mr. Arcier and Captain Hardin will attend a discussion in Washington on 28 September 1955, at which time the final release will be given to Information Services for necessary action.

5. It is believed this release will clarify the many false impressions presently existing concerning the USAF UFOB Program.

SUBJECT: (Uncl) Theory of Flying Saucers

TO: United States Air Attache
American Embassy
Buenos Aires, Argentina

1. Reference is made to your letter 197-R&D, subject "Theory of Flying Saucers" dated 24 May 1955 and our interim reply of 1 Sep 1955.

Filed Dup 2-2-7

2. The Aerodynamics Branch, Aircraft Laboratory of the Wright Air Development Center, have submitted the following evaluation of the theory contained in Dr. Neumann's manuscript.

a. The method of obtaining lift described in the report is considered very ineffective as it is based on the principle of imparting horizontal momentum to the jet and entrained air. Lift can only be produced by imparting vertical momentum to the air or jet stream.

b. The method described for producing translational control through introducing an assyme try in the jet should be effective. This type of control, however, does not provide all the control needed in an aircraft. In summary, this office does not consider the proposal to be worth further investigation.

3. No further action in this matter is contemplated by this headquarters. In accordance with your request, the original manuscript is inclosed for transmission to Dr. Neumann.

OFFICE OF THE AIR ATTACHE, American Embassy, Djakarta, Indonesia

TO: Director of Intelligence, Hq USAF, ATTN: AFOIN-X, Washington 25, D.C.

1. Subject letter was delivered to the U.S. Army Attache, this station, by Mr. Onverzaagt.

2. It is believed Mr. Onverzaagt obtained the name of the Air Attache from a nameplate on his desk, as the Air Attache's office was used to make delivery of the letter. This procedure was necessary as the Army Attache's office was disorganized due to redecoration.

3. The Army Attache advises that the contents of the letter is of little value with Mr Onverzaagt expressing an interest in manufacture of conventional aircraft and otherwise (flying saucers), and wanted a visit to the United States under official status.

AFOIN-2B 1st Ind 10 OCT 1955

Dept of the Air Force, Hq USAF, Washington 25, D. C.

TO: Commander in Chief, Continental Air Defense Command,
ATTN: DCS/Intelligence, Colorado Springs, Colorado

1. The proposed Canadian-U.S. directive on an international system for reporting vital intelligence sightings is progressing favorably, and it is anticipated that an agreed draft will be referred to the JCSC for its coordination in the very near future.

2. The NATO does not have the collection capability suggested by basic communication, and the committee drafting the proposed joint Canadian-U.S. directive considered extension of the system to other nations. However, it was decided to defer this extension until the two-nation procedure had been through a trial period.

HEADQUARTERS
CONTINENTAL AIR DEFENSE COMMAND
ENT AIR FORCE BASE
COLORADO SPRINGS, COLORADO

16 Sep 1955

CODOI

SUBJECT: ~~(Confidential)~~ Reporting of Intelligence Sightings by Friendly Nations

TO: Director of Intelligence
Headquarters USAF
Washington 25, D. C.

1. Considerable effort has been expended at both Headquarters USAF and Headquarters CONAD to develop procedures for reporting vital intelligence sightings which are broader in scope than those presently contained in JANAP 146(C). Some progress has been made in that reporting by U.S. aircrew personnel flying over Canada, Greenland, and Iceland is now authorized. In addition, it is understood that several conferences with Canadian representatives have been held at Headquarters USAF to draft a U.S.-Canadian document which will replace JANAP 146(C) and will be directive in both countries.

2. The adoption by Canada and the U.S. of a common system of reporting is considered highly desirable, and brings to mind the possibility that other Allied nations might also participate in such an arrangement. The North Atlantic Treaty Organization in particular may offer the framework on which such an agreement could be based. It appears that there is considerable reporting potential in the merchant, fishing, and whaling fleets of NATO countries operating in the North Atlantic and contiguous northern seas; in their extensive transatlantic airline operations; and in the recently inaugurated transpolar operations of the Scandinavian Airline System. Other factors warranting investigation include the timeliness and reliability of reporting under a NATO system.

3. In view of the paramount importance of warning, it is requested that the feasibility of a NATO reporting system be examined and this headquarters be advised of your findings.

Captain C.A. Hardim
AFOIN-4E-4 ATIC
WPAFB, Ohio

Dear Captain Hardim,

I am writing to you at the suggestion of two persons: Captain Bob White, at the Press Desk of Air Technical Intelligence in the Pentagon, and Lew Zarem, Chief of Public Information at WADC. After speaking with both of these men, they felt that you might be amenable to an interview.

At present, with the cooperation of USAF Hq and ARDC Hq, I am working on a book devoted to various aspects of air research and development. Included among the chapters will be one on "flying saucers." However, I should like to emphasize that this chapter will not in any way play up to the crackpot fringe of enthusiasts nor will it attempt, as so many other writers do, to imply that Air Force Intelligence is trying to hide things from the general public.

In fact, the major aim of my chapter will be quite the opposite: I want to give an honest human-interest report on how harrassing and even nerve-wracking the "saucer" situation has been to personnel of the Air Force, who are only trying their darndest to do an honest job of protecting the American people by keeping a close watch on the skies of the United States.

Actually, I would like to present the story in human terms such as this: little anecdotes that may have happened to you and other men on the project at WPAFB--false reports, false condemnations, even false accusations by the press; the scientific techniques or systems you use to evaluate reports of "saucers"; your attitudes toward the overabundance of irresponsible writers (without naming them, of course) who cause you unnecessary trouble and take up valuable time by inspiring hysterical people throughout the U.S. to bother you, etc.

If you agree to an interview (and I sincerely hope that you will), I can promise you three things: 1. the story will be

NW 91198 DocId:34745775
Page 218

treated sympathetically--from your point of view; 2. it will be sent to you for review before publication--you may check Lew Zarem, who knows me well, on my integrity in this respect; and 3. I will try to take up as little of your time as possible in carrying out the interview.

I would be extremely grateful to you both for an opportunity to interview and for a reply to my request as soon as possible--since the book is against quite a strict deadline. If you do not mind, you could give your answer to Lew Zarem and he will notify USAF Hq, which in turn will get in touch with me.

The best possible dates for an interview, in terms of my present schedule, would be any time on Monday, Tuesday or Wednesday, October 31st and November 1st and 2nd respectively.

Thank you very much in advance for whatever consideration you may give my request!

Cordially,

Lloyd Mallan
